"SOCIETY OF AMERICAN MILITARY ENGINEERS"

Experience JETC's Mission-Critical Activities

We're excited that you are looking to incorporate JETC: *Igniting Ideas* into your schedule and want to support your case to attend. As part of these efforts, we've put together this Justification Toolkit, providing you with information to garner the authorization to attend.

- JETC is the premiere military education and training event bringing together the uniformed services, the Joint Staff, and Combatant Commands to connect with each other and the industry firms that support the nation's infrastructure needs in war and peace.
- You will experience never-ending opportunities to gain knowledge that directly supports your assigned duties, from technical sessions and tabletop exercises to live simulations and roundtable discussions on the most pressing issues related to supporting our nation's infrastructure.
- Hundreds of exhibiting companies stand ready to discuss the solutions and services that help secure our nation, deliver reliable facilities, and enable survivability support.

JETC – Now More Than Ever

A commitment to readiness and supporting the warfighter requires more engagement than ever.

Attendance at SAME's Joint Engineer Training Conference is strategically aligned with the DoD's core objectives.

It fosters collaboration, innovation, and knowledge-sharing among uniformed and industry leaders, ensuring that attendees are equipped to advance their missions effectively and contribute to national security goals.

More than 2,000 A/E/C professionals will come together at JETC, facilitating countless opportunity for collaboration between military and industry professionals, fostering discussions and initiatives that enhance military capabilities.

Attendance allows DoD and government agency professionals to network and align their projects with national security objectives, ensuring readiness to deter threats effectively.

Meet Goals & Objectives Prioritized by Leadership at JETC

Matching Threats to Capabilities

Engaging with experts at JETC will provide insights into cutting-edge technology and best practices, ensuring that modernization efforts are tailored to address current and emerging threats effectively, particularly from near-peer adversaries.

Reviewing the FY26 Budget to Shift Funds Towards New Priorities

JETC offers a platform for discussions on effective budget allocation and resource management. You'll gain insights into innovative funding strategies that align with DoD priorities, facilitating adjustments to the fiscal budget to meet modernization and readiness needs.

Reinvesting \$50 Billion in Pentagon Funds

Connecting with industry leaders and stakeholders at JETC can lead to partnerships that maximize the impact of reinvested funds. Collaborative projects can emerge, driving the development of modern systems and technologies that strengthen military capabilities.

Enhancing Combat Capabilities, Modernizing Nuclear Systems

Participation allows DoD members to engage in critical dialogues about nuclear posture and modern combat capabilities. Insights gained here will ensure that military plans align with the ongoing commitment to enhancing nuclear deterrence and overall military readiness.

Rapidly Deploying Emerging Technologies

JETC features presentations on the latest advancements in technologies like artificial intelligence and unmanned systems. Attendees will leave equipped with knowledge on how to integrate these innovations into military operations, aligning with priorities to enhance effectiveness.

Critical Cybersecurity Measures

Cybersecurity is frequently a key topic at the conference. Attendance will enable discussions with leading experts in this field, helping attendees develop strategies to strengthen cybersecurity frameworks that protect national defense assets and infrastructure.

Ensuring Effective Nuclear Modernization

The conference provides a unique opportunity to discuss nuclear command, control, and communications modernization with peers and specialists in the field. Insights gained will support the DoD's commitment to maintaining a credible and effective nuclear deterrent posture.

Strategic Conference Activities

Service Engineering Chiefs and Federal Agency Leaders, along with 225+ invited speakers, addressing current & emerging threats and sharing expertise and insights into best practices and cutting-edge technologies.

Unrivaled training and education opportunities including the **Pre-conference Warfighter Seminar: *Pacific Humanitarian Assistance / Disaster Response Tabletop Exercise***

70+ educational and training sessions in tracks such as resilience and warfighter engineering.

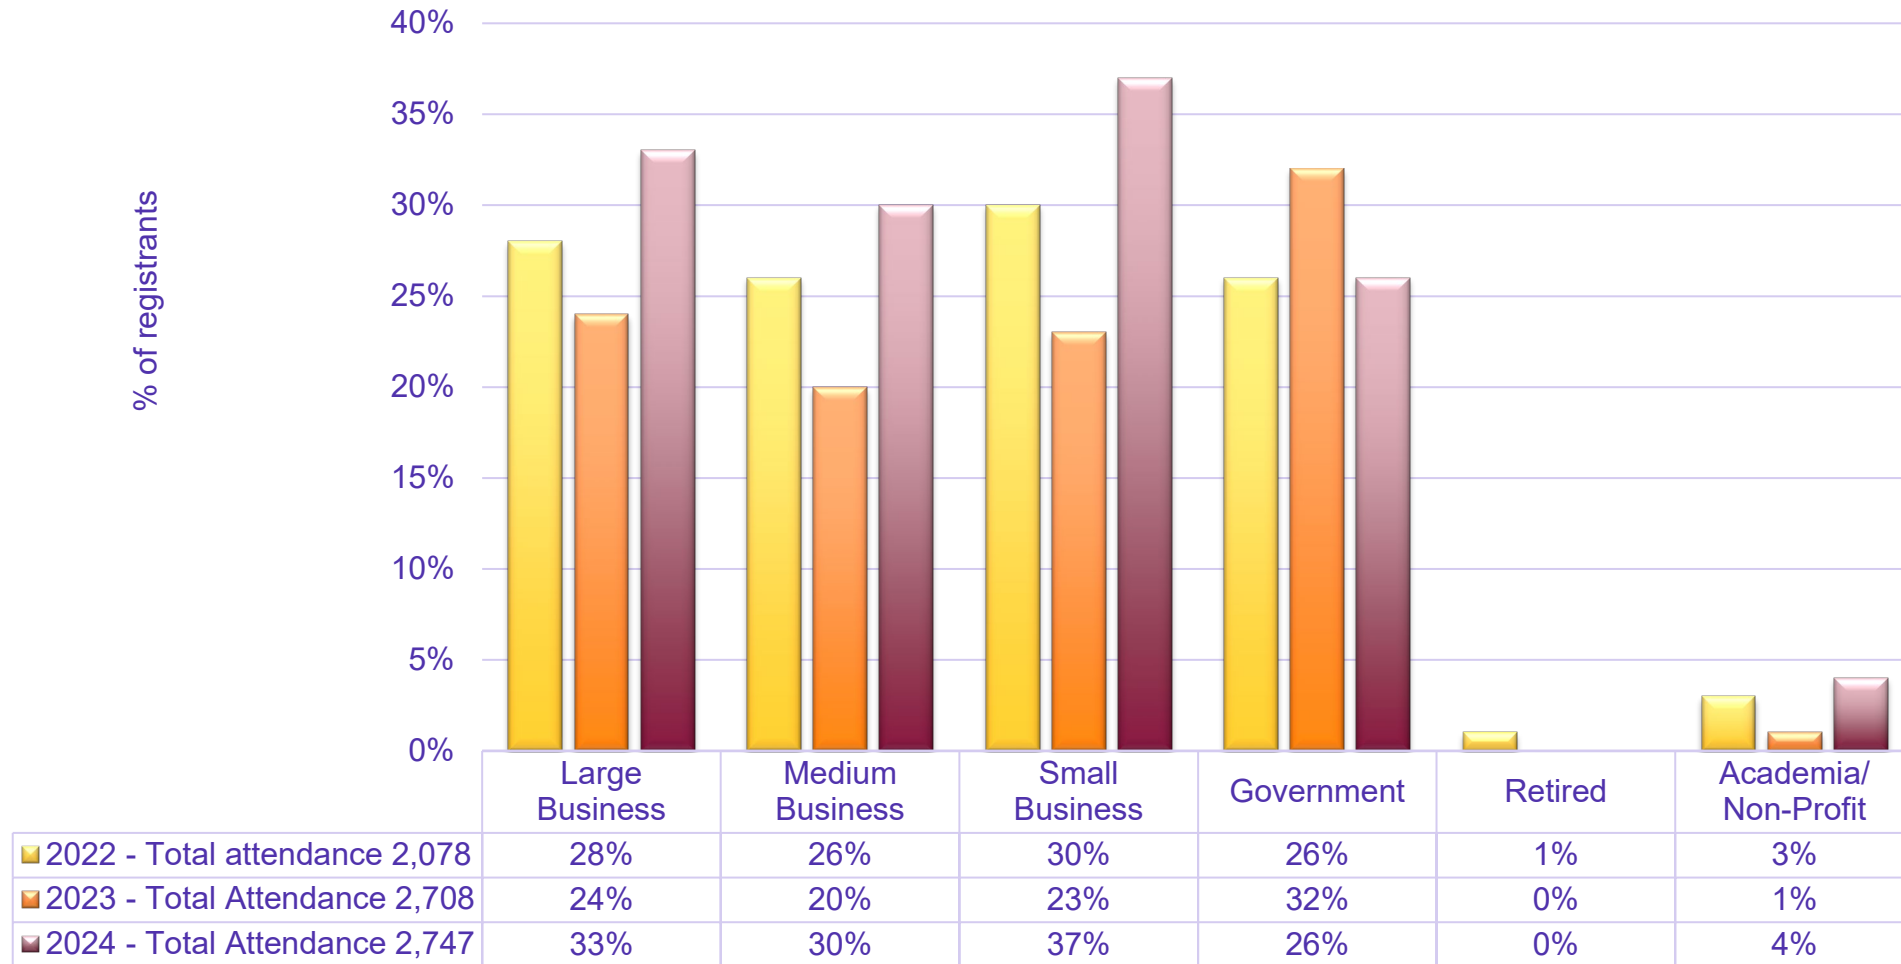

Exhibit Hall featuring 200+ Leading A/E/C Companies and find solutions for your agency or service

LIVE simulations and demonstrations in the Innovation Pavillion
